## EMPLOYMENT HISTORY

### Web Developer, MeetingPackage

Espoo

Feb 2019 — Present

## PROJECTS

### MeetingPackage's Customer Journey

2020 — Present

MeetingPackage's Customer Journey project involves all the development in customer-facing pages. This is a white-label solution, meaning different hotels can have the looks and feels that match their brands. My main responsibilities include:

- Develop, Design, and Maintain customer-facing pages in Vue
- Maintain legacy projects
- Assist in backend development

### MeetingPackage's Venue & Sales Management

2020 — Present

MeetingPackage's Venue and Sales management software is an all-in-one solution that helps venue suppliers easily manage their contents, inventory, and sale analytics. During my position here as a Frontend Developer, my main tasks in the project include:

- Redesigning and Maintaining legacy dashboard pages
- Initiating and Developing new pages in React
- Assist in backend development

### MeetingPackage's Booking Engine Widget

2021 — Present

My responsibility in this project includes developing and designing the widget solution. Storybook is used to enable easy sharing of design and quick feedback.

### Cell-Culture Simulator

2021 — 2021

In Data 4 Healthy Recovery hackathon, I was Cell-Culture Simulator team and my responsibility is to create an interactive dashboard that enables scientists to perform cell-culture simulations on a computer or mobile devices. As a result, our team was chosen as the winning team in the EU Data 4 Healthy Recovery Accelerator.
